EXPERIENCE

Junior Software Developer sep 2024 - present
Siclarity Software Solutions Pvt Lts *Mumbai, India*

- Developing and maintaining a high-performance Semiconductor Chip Designing Platform. Building dynamic, responsive UI components using ReactJS, Bootstrap, and JavaScript to enhance usability and user experience.
- Collaborating with backend and product teams to deliver features aligned with chip design workflows. Contributed to backend development using Python (Django), working on RESTful APIs, data models, and serverside logic
- Worked with PostgreSQL and DBeaver for database design, queries, and data handling. Designing scalable and reusable frontend components with a focus on maintainability and cross-browser compatibility.

PROJECTS

E-commerce website [ReactJs]. Created a website where people can shop online easily. Using ReactJS, HTML, CSS, and JavaScript, made it responsible that make sure the website works well on computers, phones, and tablets. ([Try it here](#))

Real-State website [ReactJs] I led the creation of a modern real estate website to make finding properties online easier. Using ReactJS, HTML, CSS, and JavaScript, I made a website that looks great and is easy to use. ([Try it here](#))

Chat-app [ReactJs, MongoDB, ExpressJS, NodeJS] Chat-app website made with ReactJS for the front part, and NodeJS with ExpressJS for the back. We use MongoDB to keep user details and chat messages. It lets people talk to each other instantly. I made sure the website is easy to use, secure, and runs smoothly. This project shows my skills in making websites from start to finish, and how I can use different tools to create useful things online. ([Try it here](#))
